PROFILE

To leverage my skills in web and application development along with data science expertise to build innovative and data-driven solutions. Proficient in Python and modern web technologies, I aim to continuously enhance my technical abilities while contributing effectively to organizational growth.

EDUCATION

Greater Noida Institute of Technology, Greater Noida, India **2023 - 2027**

- *Computer Science and Engineering (Data Science)*
- *Central Board of Secondary Education (Class XII)* **2023**
- *Central Board of Secondary Education (Class X)* **2021**

SKILLS

Languages: HTML5, CSS, JavaScript, Python, C, C++, NodeJS

Libraries: React JS, Tailwind CSS, Express JS, NumPy

APIs & Auth: JWT Authentication, Role-Based Authorization

Databases: MySQL, Relational Schema Design, MongoDB

Tools: Git, GitHub, Postman

Concepts: OOPS, Client-Server Architecture, CRUD Operations

PROJECTS

- **Fire Fighter Robot**
  - Developed a hardware-based fire-fighting robot capable of detecting and extinguishing fire using sensors.
  - Utilized components like flame sensors, water pump, and microcontroller for real-time fire detection and response.
  - Implemented autonomous navigation and obstacle avoidance for efficient operation in hazardous environments.
- **Crop Prediction System**
  Python | Numpy | Pandas | Scirit-Learning
  - Developed a machine learning model to predict suitable crops based on environmental factors like soil type, temperature, humidity, and rainfall.
  - Performed data preprocessing, feature selection, and model training to improve prediction accuracy.
  - Implemented algorithms such as Decision Tree / Random Forest for classification.
  - Enabled data-driven decision making for better agricultural planning.
- **Student Learning Platform** (https://github.com/bhardwajshivang57-spec/student-learning)
  ReactJS | NodeJS | Express JS | MongoDB | Tailwind CSS | JWT
  - Designed a full-stack learning platform enabling students to access educational content and manage their learning progress.
  - Implemented secure authentication and authorization using JWT and role-based access control.
  - Enhanced scalable backend APIs with Node.js and Express, and integrated with MongoDB/MySQL database.
  - Created a responsive and interactive frontend using React and Tailwind CSS.
